There are a good many who will be surprised by this
seasons NY Knicks. I think larry made a mistake and
how many would be surprised if the Knicks make the
playoffs and go to the second round?

Heterosexual Terrorism and Heterosexual Dictatorship

Heterosexual people are terrorists. They have always attacked and agressed people. They have always molested, bullied and criticised others. When the others criticise them, they threaten them. They want to silence them. They do not accept criticism. They claim the right and the freedom to attack and criticise others but they refuse others this same right to criticise them.

Heterosexual people terrorize others by violence and repression. They terrorize people also by passing discriminatory laws against others. This heterosexual terrorism and dictatorship have been legalised and institutionalized. There is something common in heterosexual people, terrorists and religious extremists and fanatics. Their psychologies are more or less the same.

Heterosexual people are like dictators and religious fanatics. They do not accept that people question and criticise them. They are tyrannical. They want to make people believe that heterosexuality cannot be questionned, analyzed, criticised and challenged. This shows that heterosexuals are totalitarian.

Heterosexual people have oppressed others for centuries and if we suggest making them feel for only a week (or even a day) what they have done to others, they rant and threaten with violence. This confirms the terrorist nature and mentality of heterosexual people. They are the source of all evils in this world. The only solution is to remove them from the world. All hetero bandits, hetero pigs, hetero fornicators, hetero perverts, hetero fanatics
and hetero murderers should be condemned to death. The world will be a better place without those hetero shit.

Heterosexual people are terrorists. They like to resort to violence. They don't care about children. They just use children as an arm and a shield to justify and defend their lustful and lascivious heterosexual desires.

All dictators and terrorists are heterosexual.

The talibans who were dictatorial and who tortured women were also heterosexual. All those black dictators of african origin are heterosexual.

Heterosexuals have always been on the offensive. They have always attacked others without good arguments. Their attacks are based on lies, violence, vulgarity and injustice. Gays and other groups of people have always

been on the defensive. This is why heterosexuals have become arrogant and tyrannical. Gays and other groups of people should strike back more often. They should counter attack They should be more on the offensive also. In fact it is heterosexuals who have not respected others. They have oppressed others. The others have the right to strike back. Heterosexuals have always acted like terrorists. This is Heterosexual Terrorism. They should be condemned.

Five articles are reproduced below to show how heterosexuals are murderous, abnormal, perverted, sinful and dirty.

Heterosexuals are beasts and filthy

Heterosexuals like to criticise others when they have themselves many more faults, defects, vices and perversions.

Heterosexuals are monsters. In 1999, in a few days heterosexuals committed many monstrous crimes. In Egypt a man stabbed the lover of his wife 300 times and then cut his head. In Israel a man set fire to the house of his wife, killing his wife and his children. In atlanta, USA a man killed his wife and children and then killed 9 other people.
Heterosexuals are beasts. Heterosexuality is bestiality.

Some time ago, in belgium, a pastor and his daughter with whom he had an incestuous relationship killed 10 people. 5 were members of their family. The two heterosexuals got rid of their victims by dissolving their bodies in acid. The heterosexual man was a pastor and a theology teacher.

In Gloucester, Great Britain, frederick and rosemary West who were husband and wife, killed and buried 18 persons. Some were their children.

In the eighties, a heterosexual man in california raped, tortured and killed more than 15 women. the man took sadistic pleasures in seeing the women suffered. One of his methods was to cut them with an electric saw. The man took pleasure in seeing the women shouting in terrible pain.

Several years ago in South America (Colombia) a heterosexual man raped and killed more than 100 girls.

In France the parents of a 5 year old boy martyrized the little boy for years. They beated him and imprisoned him in a little cage. They took pleasure in seeing the little boy suffered.

A few years ago in France a Head of school killed the prostitute he was frequenting because the prostitute no longer wanted him.

There are many other cases of heterosexual atrocities.

Every week (sometimes every day) in the media of the world you can read and hear about heinous crimes committed by heterosexuals.

Heterosexuals like to brag and threaten people about many things. Then for offences and crimes they must be punished more severely because they have no extenuating circumstances.

There are only three possibilities for them. Either they are shut in psychiatric hospitals or they are shut in prisons or they are executed.

It is not because many parents are heterosexual that they are perfect. Many parents and heterosexuals want only to satisfy their vicious desires. Children are just the result of their vices. It is not that because something is necessary that it is perfect. Excrement is necessary and it is not perfect. Heterosexuals are like excrement. They are not perfect, they are disgusting and wicked.

Heterosexuality is no longer necessary to have children. Artificial Insemination is replacing it.

Some heterosexuals say that they have to fornicate to ensure the survival of humankind. Their argument does not convince at all. First we do not need so many children on this earth. On the contrary it will be better if they stop copulating and fornicating. There will be less vices and less problems caused by heterosexuals and overpopulation. If those heterosexuals stop copulating and do not have children we will not regret at all. We will rejoice because there will be less problems and more resources available for people existing on earth. It is better to have quality than quantity, that is, it is better to have fewer people who are better and having a better quality of life than having too many people who are bad and who degrade the quality of life.
Secondly to have children, heterosexuals do not need to have so many copulations. They have thousands times more copulations than necessary. It is as if an employee is asking thousands times more money for the real value of a job or a seller is making people pay thousands times more than the
real value of an article.

If those heterosexuals stop copulating the world will be a better place. The world do not need those type of people. There are people more than necessary on this earth. There are also enough smart people on this earth. Many
problems (crimes, vices, theft, exploitation, etc) caused by heterosexuals will disappear. So we say, let them stop copulating and having children.

Heterosexuals are the greatest killers and the greatest perverts

Heterosexuals are the greatest killers. Since the beginning of the world heterosexuals have killed as many as the increase in population at a particular period and sometimes much more. For example in 1970 there were 4 billions people. Now there are 6 billions people. In 30 years the population has increased by 2 billions. In the same period heterosexuals have killed approximately the same number of people.

From 1970 to 1999 an average of 50 millions abortions were perpetrated each year by heterosexuals (Data from United Nations and World Health Organization). This means that in 30 yrs, 50x30=1500 millions abortions have been committed. Heterosexuals are guilty of 1.5 billions abortions in t hat
period of time. Heterosexuals are guilty of this holocaust and genocide of

children. Heterosexuals are worst than the Nazis.

Heterosexuals committed about 150 crimes per year per million people. From 1970 to 1999 the average world population was 5 billions, that is 5000 millions people. Therefore each year heterosexuals committed 5000x150=750000 crimes. For 30 years they committed 30x750000=22,500,000 crimes.

During that period heterosexuals killed also about 100 millions people in wars (soldiers and civil population).

During that period heterosexuals also killed about 100 millions people by various diseases such as syphilis, gonorrhea, herpes, AIDS, tuberculosis, leprosy, etc. In the world 85% of AIDS are caused and transmitted by heterosexuals. AIDS is a heterosexual disease. AIDS means heterosexuality.

During that period heterosexuals have killed and maimed about 100 millions children through wars, molestation, child batterings, ill treatment, lack of care and abandonment. Heterosexuals had also killed and are still killing
millions of children in the bellies of their mothers by their furious and savage copulations.

During that period heterosexuals have killed about 1,825 millions people, that is, 1.825 billions (by abortions+crimes+wars+diseases+child batterings and lack of care,etc).

Heterosexuals are therefore the greatest killers, the greatest murderers, the greatest perverts and the greatest monsters.
Heterosexuals are the most dangerous people.

Shame on heterosexuals.

Heterosexuals say they give life to babies but they must remember that for every person alive, they have killed another person. They give life but at what cost. The cost is violence, crimes, vices, perversions, wars, agressions and sins. The price of their life giving is very high. They must also remember that most heterosexuals want only to satisfy their sexual and vicious desires. Children are just the consequences. Heterosexuals have nothing to be proud about having children. On the contrary they should be ashamed of themselves for all the negative and catastrophic effects of their selfish and vicious copulations and fornications.

Heterosexuals commit crimes against children and against humanity

Heterosexuals are perverted people. They are also child abusers and molesters. They have perpetrated almost all of the crimes against children and against humanity. Throughout history they have committed millions of crimes against children. Today too they commit thousands of crimes against children. Thousands more go unnoticed since they are not reported to the police or the press. They have used children only for their own interests.

The children have not asked to be born. Therefore the parents have more responsibility and duty towards the children than the children towards

their parents. The parents say they do things for the children. The children too
do things for their parents. They give meaning to their lives, they strengthen the relationships of the parents and they give the parents a justification to indulge in sex. Often too the children look after the parents when they get old. The parents have obtained more than they have given. They have been paid back more than enough.
In spite of this, heterosexuals have beaten and ill-treated children for centuries.

They are also responsible of child labour. Many heterosexuals want only to satisfy their sexual desires without caring about the consequences. They have caused 300 millions children to be born in miserable and dangerous conditions. They have put these children to slavery. The
figures in million on child labour by United Nations are thus:

Brazil : 25 millions
Colombia : 3 M
Mexico : 10 M Pakistan : 3 M
United States : 1 M Philippines : 3.5 M
Italy : 0.5 M India : 50 M
Thailand : 3 M

and many millions in other countries also.

Battered children most of the times happen in families and are caused by heterosexuals. The parents are not punished sufficiently. Here is a heart breaking case among thousands others:

Police detective breaks down in child abuse case

A couple tied their son to a door for two years because he was not born a girl, a court heard. Police found the four year old boy and his two year old brother with
extensive injuries in a house in suburban Sydney, police woman Lola Scott told the court.

The parents, Donald Cappeti, 39, and his wife Robyn, 38, face eight charges of grievous bodily harm. The prosecution said they were the worst child abusers Australia had seen.

Scott wept as she told a preliminary hearing how David Capetti, who sufferered from gangrene in one foot, was tied to a door for two years as punishment for not being born a girl. He weighed only 25 lbs and had severe rope burns on his body, she said.

David and his brother Darren had not been bathed for two months and were fed only occasionally. The younger child had extensive burns, Scott added. The parents will appear in court again in September 12. Magistrate John Hiatt refused bail, saying the offences were "too horrific".

Heterosexuals are liars and lascivious

Heterosexuals hide themselves behind children. Heterosexuals always use children as pretext. In the past they had 10 to 20 children. If they had really wanted all those children, they should continue to have 20 children. But nowadays contraceptives exist and they have only 1 to 3 children. This is proof that they place the satisfaction of their desires before everything. Heterosexuals are uncontrollable. If contraceptives do not exist, they would still have 20 children, with all the disastrous consequences for the family, society, the country and nature.

Moreover, all those sexual relationships are not necessary. To have 3 children only about 10 copulations are sufficient. But heterosexual couples have on average 4000 copulations in their lives. This means that the 3990 relationships are not necessary. They use children to justify them. They hide themselves behind children.

Artificial Insemination must be popularized. All the companies manufacturing contraceptives will be converted into Artificial Insemination clinics. Then the sexual act will be a thing of the past, just as the washing machine is replacing more and more washing by hand.

Heterosexuals are uncontrollable (compulsive desire - a mental illness). They are also egoist, irresponsible, vicious and lascivious. They commit millions of abortions which are premeditated crimes. They are thus criminals.

The ugliness of heterosexuality

The perversities of heterosexual people

When the woman becomes a wheelbarrow
The man stands between the legs of the woman and holds her legs with his hands. The woman has her head down with her hands on the floor. The woman ressembles a wheelbarrow that the man is going to push. As the woman moves in front with her hands, the man follows her and strikes her with his penis in her hole. Both get excited viciously and perversely. The man pushes the woman-wheelbarrow. Now and then they stop and the man strikes the woman more furiously and viciously with his penis in her hole. When the woman moves with her hands on the floor, the man follows her. When the man pushes the woman, she moves by making steps with her hands. After being perversely satisfied, they stop. From time to time they perform this vicious sexuality.

This is only one example of the perversities of heterosexuals.

Heterosexuals are the greatest fuckers and the most vicious and dirty. They fuck women in front, at the back, at the top (mouth), in the middle (between breasts). They are cunt lickers, ass lickers, shit eater and urine drinker. Their houses are like brothels and toilets. Their houses are stinky of shit and urine. They have turned the world into brothels.
They are also the greatest child abusers and the greatest rapists. They are also the greatest murderers. They commit almost all abortions which are premeditated crimes. They fill the world with their shit and their filth. Almost all prostitutes and brothels are heterosexual ones.
Their riches and their comfort are based greatly on theft, exploitation and domination.

Heterosexuality is bestiality
Heterosexuals are violent, vicious, criminal, depraved
Heterosexuals are perverted
Heterosexuals are thieves
Heterosexuals are fornicators
Heterosexuals are rapists
Heterosexuals are vampires. They like to bite their partners like vampires.
Heterosexuals are sinners. They commit all sorts of sins.
Heterosexuals are cunt lickers
Heterosexuals are ass lickers
Heterosexual men are hungry of women. They want to devour women.
Heterosexual men want to stab women between their legs with their penises.
Heterosexuals are corrupting and rotting the world.
Heterosexuality is despicable and repulsive.
Heterosexuality is beastly and sick.
Heterosexuals are bestial
Heterosexuality is bestiality
Heterosexuals are disgusting and nauseating.
Their lifestyles are disgusting, nauseating and repulsive.

Heterosexual men are so vicious on women's breasts and in their vaginas that
they cause breast and uterine cancers in women.

Heterosexuals are abominable
Heterosexuals will be condemned to hell

Artificial Insemination Clinics should be encouraged to be set up.
Artificial Insemination will replace heterosexuality.

Heterosexual Terrorism

A man chases a woman, catches her, throws her on the floor. He pulls down his trousers, lifts her dress and removes her slip. He then starts to stab her between her legs with his penis. He stabs her furiously, savagely, bestially, viciously and perversely. He continues to stab her, stabs her again and again and now and then insulting her with obscene words. He takes vicious pleasure in seeing the woman at his mercy and enduring his perverse sexual assault.

Let women chain heterosexual men, lead them like animals, whip them and strike them with their needle heel shoes. Let women urinate and defecate on heterosexual men. They will like it because it is in the nature of heterosexual men to live under women's cunts. For women's cunts they will be on their knees and crawl like an animal.

Let Heterosexuals Die from Calamities

African and islamic countries are homophobic. So when AIDS, earthquakes, wars and other calamities strike them, don't help them. Let them die. Let heteros die because by helping them, you will help your enemies and your oppressors to oppress you more. You will save your oppressors and give them the chance to attack and oppress you more and again. Therefore don't help them. Let heteros die.

More than 90% of AIDS cases in the world are heterosexual ones. Let heteros die of AIDS. Let AIDS remove those hetero viruses and hetero pests. AIDS, earthquakes and other calamities are the anti-viruses to eliminate and reduce the heterosexual viruses and heterosexual pests. Let those hetero fornicators get destroyed. They would otherwise spread their filth in the world.

Let women chain heterosexual men, lead them like animals, whip them and strike them with their needle heel shoes. Let women urinate and defecate on heterosexual men. They will like it because it is in the nature of heterosexual men to live under women's cunts. For women's cunts they will be on their knees and crawl like an animal.

Countries and States that oppress gays are terrorist states. They should be attacked like Afghanistan and Irak. They have no right to exist in a modern civilized world. The Vatican, Iran, Saudi Arabia, Zimbabwe, Namibia, Nigeria, Malaysia, Poland, etc are terrorist states. They deserve the treatment reserved for terrorist states.

Hetero pervert, you are rotting the world. All hetero bandits, hetero terrorists and hetero fornicators should be nuked. The world will be better without those hetero shit and hetero pests.

Thread where outing begins: http://tinyurl.com/hojf8
George Pickett Memorial Trophy, Special Ops Cody Memorial Purple Heart,
and the Order of the Holey Sockpuppet winner <wfh_jr@hotmail.com> on
outing personal contact info in x-poasted subject lines:
"Plenty of people post under their real names and do not attempt to hide
their contact info. You are scared of being 'outed' because you are a
pathological abuser of usenet, and people rightly despise you for it.
You're afraid of being reported to the authorities or, better, visited
by a couple of guys with baseball bats. Other people don't have this
obsessive fear. Ward Hardman himself has posted plenty of personal
information - nothing that anyone else added was hidden in any way.
You're so fucking scared you've built up this whole sick mythology about
different categories of bad dudes who 'out' scum like you.

"Meanwhile you are the ugliest pigfucker in the universe. You are the
coward without ethics. You call me a 'newbie' - ha! what an asshole you
are. Those who want to remain anonymous do so. There is absolutely no
way you could identify me, not unless you had the sort of subpoena power

that only gets turned on for big-time terrorists. That's because I chose to be anonymous. Some people don't. Only really stupid dicks like you choose the sort of semi-anonymity which leaves you in constant fear.

"What a dickless wonder you are 'Snarky' you fat asshole."

"I am the only one who has outer filthed Ward" -- James C. "Crackhead" Cracked voluntarily self-immolates, in MID: 1159678991.838385.310840@m7g2000cwm.googlegroups.com

"When I told Abbie Hoffman that he was the first one who made me laugh since Lenny Bruce died, Hoffman said, "Really? He was my god." The combination of satirical irreverence and sense of justice that Bruce and Hoffman shared was the real spirit behind the Yippies--a term I coined to describe a phenomenon that already existed: an organic coalition of stoned hippies and political activists who engaged in such actions as throwing money on the floor of the New York Stock Exchange, then explaining to reporters the meaning of that symbolism. Folksinger Phil Ochs summed it up: "A demonstration should turn you on, not turn you off." So when journalists link the Yippies with misleading bedfellows, at best it's careless shorthand; at worst it's deliberate demonization. Osama bin Laden wanted an aircraft to crash into the Pentagon. Abbie Hoffman merely wanted to levitate it." -- Paul Krassner, http://tinyurl.com/ehu3v

You know, if you're going to leave my nick in the attributions, Morgan,
leaving a bit of context wouldn't hurt. Otherwise, one would get the
idea that you are (falsely, I might add) accusing me of being a
"criminal". Just so you know, RRAP isn't "yours", it's mine, or at least
AUK's. You and your pet troll just happen to have some big ideas.

Sampath has a lot of company, and I don't just mean the two who were added by "bill" (he's another in the aforementioned company, due to his raving, raging homophobia (an obvious case of repression), for example).

The combination of satirical irreverence and sense of justice that Bruce and Hoffman shared was the real spirit behind the Yippies--a term I coined to describe a phenomenon that already existed: an organic coalition of stoned hippies and political activists who engaged in such actions as throwing money on the floor of the New York Stock Exchange, then explaining to reporters the meaning of that symbolism. Folksinger Phil Ochs summed it up: "A demonstration should turn you on, not turn you off." All the power to him. If someone wants to pay 20 cents for a PDF file that already has info on it, so be it. If I was going to buy an amp, I would get them at www.rmitaly.com, instead of his amp. His amps don't even have silk screening. They are label by something that looks like a P Touch.

Hey Brian. I am not your enemy here. I don't care if you sell them or not. I only questioned why would would advertise here, when not selling it as a CB amp. But since you have a woodie for me, I firgured I would list the link where you have your "brochure", you are charging 20 cents for.

I'm OK though.

I'll piss on Brian Griffey eventually, just like I do to every other
fucktard that posts with malice in rrcb. 10-4.

That blows for a working man like myself. The fucking workman's comp rate is re-gawd damn ridiculous. The medical insurance is trying to put me out of business too. Doomed <---- or not if you all can keep absorbing the increase year to year for my services.

I don't pay taxes right now. Have to work to pay taxes. I also have to
much assets to collect welfare.

He bad mouths me because I run fucking circles around him as a measly landscaper. Is he really selling twenty cent manuals now?

I have to leave that info for free when I spray your turf...'right to know' and such. In fact we have to warn the tree hugging neighbors in advance too, if their property a-butts our paying customer. No problem at all. We are legal and have been inspected many times without a fucking hitch.

If I pay $1 for a pound of lawn food, I try to get $4 delivered.

Trying to hijack the thread again, Mark?

Looks as if Chris put you in a corner when he said, "And before you go any
further, be aware that I used to work with Falvey back in the 80's when I
was employed as a geophysicist by the Gulf Research Company both in
Harmarville, Pennsylvania and in Houston, Texas. We sponsored part of
Falvey's research.

In short, I'm a real geophysicist. That's why I seriously doubt that you
are."

Somebody called you out on your lies and now you have no comment save to
accuse "Steve" of harrassing you again. You have no shame, do you?

>Trying to hijack the thread again, Mark?
no thread to hijack

just another of steve effort to conuct harrassment and get an answer
to question I refuse to answer and one that is off topic and not
proper to begin with
....

The question is only "not proper" because it put you on the spot as being a
liar and you are uncomfortable about being exposed as such.
Who are YOU to determine what is on topic or not on topic, anyway?
You have no credibility. No life, no common sense, and certainly no degree
in geophysics.
All you have is Usenet and a sick fixation on Steve.

You haven't got a bid yet. Maybe talk Frank, Jay, Steve, Gates, DrDeath,
AE352, and vinnie into getting on Skipland, and say they're all using
telstar, and have them give out the auction link.

You know deep down inside, they really want one.

Hello Steveo:

Wow I am a celebrity. Probably need to charge for my autograph down at the Ham Radio Store, and the fillin Station.

Good Stuff Steveo!

I am having a ball with this Icom 756 Pro, with the digital signal processing, the use of a Mast Mounted Pre-Amp/Attenuator and the beam.

I do DX on 20M. I use my CB at night to talk to locals about 10-15 miles away. I tried cracking 80M at night, but those old folks key right up on each other, and it's impossible to break in.

Hi Jay.

The dx conditions have been a bit spotty at best as of late here when I've had it on...which isn't as often as I used to fire it, but yes you are some kind of celebrity on 11 meters, anyway. I've heard guys talk about your antenna on the radio dx and nothing but flying colors so far. Mine still works like a charm and it's been through N Buckeye extremes with weather and input. Good to go.

I don't give a FUCK! Quit acting like a 2nd grader and deal with your shit like a man.

Bringing it here is the biggest way to be ignored or yelled at. I'm not going back to this stupid blog of yours either.

Grow up.

Robesin set the gold standard in thread jacking and calling people out,
though he has taken a turn at using dead people and retarded children
for cheap laughs.

OH BULLSHIT! You have his headers, his ISP or at least his posting
host's name and the number of a lawyer. Are you from Canada or
something?

I have spoken to lawyers

nothing I can to stop him from posting short of muder

I can extract judgement that he has not got the assets to pay but that
does not stop him from posting

I just talked to a guy running a wire antenna on 37.385 lsb in his basement
in solon ohio which is every bit of fifty miles away from me. He's gonna
sling shot it into a tree tomorrow. love the ground wave comm.

Jay's noodle here.

So what you are saying is consumer beware considering your amp taking a
shit because of excessive heat? Why not build your amp so the blind dont
waste their bux? Or is it <cough> a money making scheme you are up to?

And if someone forges a post from Mark Morgan, that might qualify as "ID
theft". Until then, you might want to shut yer yap and let your froggers
earn their kook awards, instead of risking becoming interesting enough to
be nominated again yourself.

Hail Eris!
Demon Prince of Absurdity

"And no, I did not have sex with my son. But if I did I certainly
wouldn't tell you. Something so beautiful and precious should be kept
private." -- Kathy L. Mosesian, or possibly not really her, confesses
she may be a liar and committer of incest with her own son, in MID:
<cfcd3f4660694e3afeaadaa2723e9ab1@msgid.frell.theremailer.net>

The reporter asked Colin Powell, "What proof do you have that Iraq has
weapons of mass destruction?"
He replied, "We kept the receipts." -- Anon.

Looney Maroon nominee for August 2006 Johnny D Wentzky foamed:
"You never asked someone who goes into areas of the internet that are
only for adults who has an underage id somehow or another if they are a
cop posing as an underage person online?
I guess lots of people just don't watch dateline or read stories much.
Why don;t you go to pervertedjustice,com and see what they do. They are
awash in their self-proclaimed glory after they lied to membners of the
public.
They are awash in their self-proclaimed glory after they posed as an
underage person and agreed to do all sorts of sex acts wioth adult
males, and they are adults posing as teenager themselves. They make
themsleves into liars by falsely impersonating underage persons and by
not fuilfilling the words they tell the victims online in their chats.
Why don't you read it where they tell these victims of their deceit
about how they have been with grown men and such? Why don't you read it
where they say, "That would be cool." after someone makes an advance
towards an adult who is posing as a teenager? And, where they agree to
meet the person, etc.

Lost control, didn't you?
Is that why you feel as if you need to lie so much now? I see where lots of these false impersonation games are not sticking. They feel as if they can lie and then order the victims to get counseling in the gayblade, governmental, pro-choice tax leech counseling centers. They are doing nothing more than usury and fraud in many cases." -- Wentzky almost comes out of the closet as a pedo/ephebophile in MID: <H%%Eg.28916$Uq1.22411@bignews6.bellsouth.net>

A: A tourist." -- Anonymous

"It would be offly hard for any of you to abuse me on usenet. Really. I have the advantage. I could easily turn alt.usenet.kooks into a cesspool of encoded posts. Bringing the noise ratio up so high as to make the group worthless. Anybody who can code could do this, why nobody has bothered before now is beyond me. The ultimate spamming engine.. 'BAWAHAHA'" -- Dustbin "Outer Filth" K00k's delusions of grandeur reached new heights, in Message-ID: <Xns98355D29419B9HHI2948AJD832@69.28.186.121>
"Immorality: The morality of those who are having a better time." -- H. L. Mencken

"Consider that language a moment. 'Purposefully and materially supported hostilities against the United States' is in the eye of the beholder, and this administration has proven itself to be astonishingly impatient with criticism of any kind. The broad powers given to Bush by this legislation allow him to capture, indefinitely detain, and refuse a hearing to any American citizen who speaks out against Iraq or any other part of the so-called 'War on Terror.'

"If you write a letter to the editor attacking Bush, you could be deemed as purposefully and materially supporting hostilities against the United States. If you organize or join a public demonstration against Iraq, or against the administration, the same designation could befall you. One dark-comedy aspect of the legislation is that senators or House members who publicly disagree with Bush, criticize him, or organize investigations into his dealings could be placed under the same designation. In effect, Congress just gave Bush the power to lock them up." -- William Rivers Pitt

Who is "Tom"?

And you are a moron. I posted nothing negative. The OP said all comments are welcome. It appears the file sizes of the pics may be too large to allow the page to load quickly. I was merely posting an opinion.

BTW Markie, do you roll around all day in your wheelchair, slobbering on yourself, and using a stylus to post here? It appears you must really be one "everything challenged" individual, as you cannot even form one coherent sentence. Does the stylus ever hurt your mouth? Or do you have one of those mouthpiece things on the end of it so that you can hold onto it while you post away, flounder boy? Aw, nevermind, I pity you and I really don't want to know.

The FCC say's that the 20 wpm extras or no more important than someone with just 5 wpm. Isn't that why they changed it from 20 to 5 wpm for ALL HF LICENSE CLASSES. What your talking about is that you don't want to follow FCC rules. If there is a QSO on a frequency YOU should move not the people already there. Unless you have emergency traffic you have NO priority over anyone who is licensed to operate on any giving frequency. Have you even past a ham test? Maybe your license should be revoked until you can prove you have read and fully understand the part 97 FCC rules.

Sure....after someone asked them if you were a minister for their
church,
they "heard of you." Now they know you for the fake rev that you are.

It might as well be for you, since you certainly aren't a minister of
the
Anglican Church.

I haven't used one in over twenty years.
We bought a Motor home and figure we need one to keep up with road conditions etc ahead of us.
I've been looking and like the features of Galaxies bu they are pricey.
I would like to et a 10 meter if the license isn't too bothersome to get.
What would you recommend in just a regular Cb and or a 10 meter?
Are the Truck Stops offering a good price on a preferred unit?
I really don't want to buy over the Internet. I haven't found one CB shop or a retailer, other than Radio Shack, withing 50 miles.

If you just want to talk to others on the road when travel a cheep radio from radio shack or a yard sale will work fine. A good place to buy used equipment cheap eBay (you can pay by money order on most of it). The galaxies are good if you have the money to buy an illegal radio. No mater what radio you get you will need is the best antenna you can get. The antenna is the must important part of a radio system.

Amateur Radio Newsgroups: Total Meltdown
Paul W. Schleck (K3FU) on April 26, 2006
View comments about this article!

Way back in 1972, before there was a World-Wide Web, even before there was Usenet News, amateur radio enthusiasts on the then-ARPANet organized a mailing list known as Info-Hams. In 1979, a couple of researchers at Duke and UNC developed a system that used "Unix to Unix File Copy" or "uucp" to copy files from one system to another, to make a broadcast bulletin-board system called "Usenet." The Info-Hams mailing list eventually gatewayed to this system, becoming fa.info-hams

(fa = "From ARPANet"), then rec.ham-radio, then rec.radio.amateur.*.

Fast-forward to the present, and the newsgroups rec.radio.amateur.misc and rec.radio.amateur.policy are now in complete meltdown (the *.antenna, *.dx, *.equipment, and *.space newsgroups still seem to be in good shape, though). Both forums are almost completely bereft of any

topic discussion. Instead, one can find run-on threads consisting of short, sniping, and personal attacks containing obscene language from what must be fewer than a dozen, mostly anonymous, users.

What happened? -- Maybe too many run-on arguments about code, or attacks on individual ham's personal character. Maybe just the anarchy and Tragedy of the Commons that is encouraged by totally-open, unmoderated forums where no one is obliged to obey any rules, and no competent authority seems able or willing to enforce them if there were

any. Further fanning the flames are free, and anonymous, news posting sites like Google Groups, Yahoo, etc., as well as any news site that simply doesn't care to enforce any net etiquette among its users. Some hams have even offered the explanation that better enforcement of amateur radio regulations by Riley Hollingsworth at the FCC has had the

unintended consequence of driving problem hams off the bands and onto a

less restrictive forum to wreck.

As for Google Groups, it certainly deserves credit for archiving most newsgroup discussions since 1981 (thanks to old backup tapes meticulously maintained by Henry Spencer at the University of Toronto),

but also a big raspberry for contributing to this problem.

This hasn't happened to every newsgroup. Even though other newsgroups have trolls, there seems to be a "immune system" of constructive users who step in both to ostracize problem users, and continue positive contributions in the face of such troublemakers. Certainly this behavior is not tolerated on web logs such as qrz.com and eHam.net. The

site owners simply would not allow it. There is at least one example of

a licensed radio amateur who is Dr. Jekyll on the blogs, but Mr. Hyde on rec.radio.amateur.policy. There may even be others.

I'm sure some would argue that Usenet is obsolete, and we are all better off going to moderated blogs. Still, I can't help but think that

something is being lost here. For example, 20 years into the future, will we be able to read archived and indexed articles from most web logs that exist today, as we now have with Google Groups? Are there constructive solutions to the meltdown on rec.radio.amateur.*, such as converting newsgroups to moderated status, even if such moderated status is simply a self-approval, or anonymous user filter, mechanism?

If I might answer your question, what did we lose: what you lose on
the
moderated web blogs is annonymity. Yes, you can have annonymity more
or
less, but somebody somewhere has to approve your posting and your
password,
and they have your email, it is a bit more of a digital paper chain
than on
usenet.

You also lose the ability to go off topic. Some fora are more strict
in
this regards than others, but there it is: sometimes relating one
issue to
something seemingly off-topic is lost, with it, the freedom to address
big
picture questions.

You lose the ability to cross post.

Etc... there are many others

Amateur Radio Newsgroups: Total Meltdown
Paul W. Schleck (K3FU) on April 26, 2006
View comments about this article!

Way back in 1972, before there was a World-Wide Web, even before there was Usenet News, amateur radio enthusiasts on the then-ARPANet organized a mailing list known as Info-Hams. In 1979, a couple of researchers at Duke and UNC developed a system that used "Unix to Unix File Copy" or "uucp" to copy files from one system to another, to make a broadcast bulletin-board system called "Usenet." The Info-Hams mailing list eventually gatewayed to this system, becoming fa.info-hams

(fa = "From ARPANet"), then rec.ham-radio, then rec.radio.amateur.*.

Fast-forward to the present, and the newsgroups rec.radio.amateur.misc and rec.radio.amateur.policy are now in complete meltdown (the *.antenna, *.dx, *.equipment, and *.space newsgroups still seem to be in good shape, though). Both forums are almost completely bereft of any

topic discussion. Instead, one can find run-on threads consisting of short, sniping, and personal attacks containing obscene language from what must be fewer than a dozen, mostly anonymous, users.

What happened? -- Maybe too many run-on arguments about code, or attacks on individual ham's personal character. Maybe just the anarchy and Tragedy of the Commons that is encouraged by totally-open, unmoderated forums where no one is obliged to obey any rules, and no competent authority seems able or willing to enforce them if there were

any. Further fanning the flames are free, and anonymous, news posting sites like Google Groups, Yahoo, etc., as well as any news site that simply doesn't care to enforce any net etiquette among its users. Some hams have even offered the explanation that better enforcement of amateur radio regulations by Riley Hollingsworth at the FCC has had the

unintended consequence of driving problem hams off the bands and onto a

less restrictive forum to wreck.

As for Google Groups, it certainly deserves credit for archiving most newsgroup discussions since 1981 (thanks to old backup tapes meticulously maintained by Henry Spencer at the University of Toronto),

but also a big raspberry for contributing to this problem.

This hasn't happened to every newsgroup. Even though other newsgroups have trolls, there seems to be a "immune system" of constructive users who step in both to ostracize problem users, and continue positive contributions in the face of such troublemakers. Certainly this behavior is not tolerated on web logs such as qrz.com and eHam.net. The

site owners simply would not allow it. There is at least one example of

a licensed radio amateur who is Dr. Jekyll on the blogs, but Mr. Hyde on rec.radio.amateur.policy. There may even be others.

I'm sure some would argue that Usenet is obsolete, and we are all better off going to moderated blogs. Still, I can't help but think that

something is being lost here. For example, 20 years into the future, will we be able to read archived and indexed articles from most web logs that exist today, as we now have with Google Groups? Are there constructive solutions to the meltdown on rec.radio.amateur.*, such as converting newsgroups to moderated status, even if such moderated status is simply a self-approval, or anonymous user filter, mechanism?

Who gives a FLYING FCUK what they say on e-ham...??

E-ham is nothing but a cheap, Dollar Store copy of QRZ.com
what makes the bullshi+ published by K1MAN look more
professional by comparison. Christ...I'd rather listen to Hap
Holly with his PERPETUALLY BAD COFFEE CAN AUDIO
on the old Westling broadcasts that read the fishwrap published
on e-hambone.

POOO ---> PFHBBBBLLLTTTTTTTTT!!!!!!!!!!

Amateur Radio Newsgroups: Total Meltdown
Paul W. Schleck (K3FU) on April 26, 2006
View comments about this article!

Way back in 1972, before there was a World-Wide Web, even before there
was Usenet News, amateur radio enthusiasts on the then-ARPANet
organized a mailing list known as Info-Hams. In 1979, a couple of
researchers at Duke and UNC developed a system that used "Unix to Unix
File Copy" or "uucp" to copy files from one system to another, to make
a broadcast bulletin-board system called "Usenet." The Info-Hams
mailing list eventually gatewayed to this system, becoming fa.info-hams

(fa = "From ARPANet"), then rec.ham-radio, then rec.radio.amateur.*.

Fast-forward to the present, and the newsgroups rec.radio.amateur.misc
and rec.radio.amateur.policy are now in complete meltdown (the
*.antenna, *.dx, *.equipment, and *.space newsgroups still seem to be
in good shape, though). Both forums are almost completely bereft of any

topic discussion. Instead, one can find run-on threads consisting of
short, sniping, and personal attacks containing obscene language from
what must be fewer than a dozen, mostly anonymous, users.

What happened? -- Maybe too many run-on arguments about code, or
attacks on individual ham's personal character. Maybe just the anarchy
and Tragedy of the Commons that is encouraged by totally-open,
unmoderated forums where no one is obliged to obey any rules, and no
competent authority seems able or willing to enforce them if there were

any. Further fanning the flames are free, and anonymous, news posting
sites like Google Groups, Yahoo, etc., as well as any news site that
simply doesn't care to enforce any net etiquette among its users. Some
hams have even offered the explanation that better enforcement of
amateur radio regulations by Riley Hollingsworth at the FCC has had the

unintended consequence of driving problem hams off the bands and onto a

less restrictive forum to wreck.

As for Google Groups, it certainly deserves credit for archiving most newsgroup discussions since 1981 (thanks to old backup tapes meticulously maintained by Henry Spencer at the University of Toronto),

but also a big raspberry for contributing to this problem.

This hasn't happened to every newsgroup. Even though other newsgroups have trolls, there seems to be a "immune system" of constructive users who step in both to ostracize problem users, and continue positive contributions in the face of such troublemakers. Certainly this behavior is not tolerated on web logs such as qrz.com and eHam.net. The

site owners simply would not allow it. There is at least one example of

a licensed radio amateur who is Dr. Jekyll on the blogs, but Mr. Hyde on rec.radio.amateur.policy. There may even be others.

I'm sure some would argue that Usenet is obsolete, and we are all better off going to moderated blogs. Still, I can't help but think that

something is being lost here. For example, 20 years into the future, will we be able to read archived and indexed articles from most web logs that exist today, as we now have with Google Groups? Are there constructive solutions to the meltdown on rec.radio.amateur.*, such as converting newsgroups to moderated status, even if such moderated status is simply a self-approval, or anonymous user filter, mechanism?

Who gives a FLYING FCUK what they say on e-ham...??

E-ham is nothing but a cheap, Dollar Store copy of QRZ.com
what makes the bullshi+ published by K1MAN look more
professional by comparison. Christ...I'd rather listen to Hap
Holly with his PERPETUALLY BAD COFFEE CAN AUDIO
on the old Westling broadcasts that read the fishwrap published
on e-hambone.

POOO ---> PFHBBBBLLLTTTTTTTTT!!!!!!!!!!

The above is probably the best one-liner I've read
in this NG for quite some time. Thanks! We needed it.

I'm sure some would argue that Usenet is obsolete, and we are all
better off going to moderated blogs. Still, I can't help but think that

something is being lost here. For example, 20 years into the future,
will we be able to read archived and indexed articles from most web
logs that exist today, as we now have with Google Groups? Are there
constructive solutions to the meltdown on rec.radio.amateur.*, such as
converting newsgroups to moderated status, even if such moderated
status is simply a self-approval, or anonymous user filter, mechanism?

Who gives a FLYING FCUK what they say on e-ham...??

E-ham is nothing but a cheap, Dollar Store copy of QRZ.com
what makes the bullshi+ published by K1MAN look more
professional by comparison. Christ...I'd rather listen to Hap
Holly with his PERPETUALLY BAD COFFEE CAN AUDIO
on the old Westling broadcasts that read the fishwrap published
on e-hambone.

Amateur Radio Newsgroups: Total Meltdown
Paul W. Schleck (K3FU) on April 26, 2006
View comments about this article!

Way back in 1972, before there was a World-Wide Web, even before there was Usenet News, amateur radio enthusiasts on the then-ARPANet organized a mailing list known as Info-Hams. In 1979, a couple of researchers at Duke and UNC developed a system that used "Unix to Unix File Copy" or "uucp" to copy files from one system to another, to make a broadcast bulletin-board system called "Usenet." The Info-Hams mailing list eventually gatewayed to this system, becoming fa.info-hams

(fa = "From ARPANet"), then rec.ham-radio, then rec.radio.amateur.*.

Fast-forward to the present, and the newsgroups rec.radio.amateur.misc and rec.radio.amateur.policy are now in complete meltdown (the *.antenna, *.dx, *.equipment, and *.space newsgroups still seem to be in good shape, though). Both forums are almost completely bereft of any

topic discussion. Instead, one can find run-on threads consisting of short, sniping, and personal attacks containing obscene language from what must be fewer than a dozen, mostly anonymous, users.

What happened? -- Maybe too many run-on arguments about code, or attacks on individual ham's personal character. Maybe just the anarchy and Tragedy of the Commons that is encouraged by totally-open, unmoderated forums where no one is obliged to obey any rules, and no competent authority seems able or willing to enforce them if there were

any. Further fanning the flames are free, and anonymous, news posting sites like Google Groups, Yahoo, etc., as well as any news site that simply doesn't care to enforce any net etiquette among its users. Some hams have even offered the explanation that better enforcement of amateur radio regulations by Riley Hollingsworth at the FCC has had the

unintended consequence of driving problem hams off the bands and onto a

less restrictive forum to wreck.

As for Google Groups, it certainly deserves credit for archiving most newsgroup discussions since 1981 (thanks to old backup tapes meticulously maintained by Henry Spencer at the University of Toronto),

but also a big raspberry for contributing to this problem.

This hasn't happened to every newsgroup. Even though other newsgroups have trolls, there seems to be a "immune system" of constructive users who step in both to ostracize problem users, and continue positive contributions in the face of such troublemakers. Certainly this behavior is not tolerated on web logs such as qrz.com and eHam.net. The

site owners simply would not allow it. There is at least one example of

a licensed radio amateur who is Dr. Jekyll on the blogs, but Mr. Hyde on rec.radio.amateur.policy. There may even be others.

I'm sure some would argue that Usenet is obsolete, and we are all better off going to moderated blogs. Still, I can't help but think that

something is being lost here. For example, 20 years into the future, will we be able to read archived and indexed articles from most web logs that exist today, as we now have with Google Groups? If I might answer your question, what did we lose: what you lose on
the
moderated web blogs is annonymity. Yes, you can have annonymity more
or
less, but somebody somewhere has to approve your posting and your
password,
and they have your email, it is a bit more of a digital paper chain
than on
usenet.

You also lose the ability to go off topic. Some fora are more strict
in
this regards than others, but there it is: sometimes relating one
issue to
something seemingly off-topic is lost, with it, the freedom to address
big
picture questions.

You lose the ability to cross post.

Etc... there are many others

Forget 10 meter. It's used for SSB and only active at peak solar cycle, plus you need a license. Get a Uniden. All you are looking for in channel 19. The Unidens are fine, and under $100. The Galaxies are a overrated drift machine, that is overkill for your use.

Hello john:

Yeah what Vinnie S. said, Ten-4! Good call.

I have a few friends with motor homes, and they all had problems with the antenna mounting. Or crappie cheap antennas falling apart on the motor home.

The fix for this is using a 3/16 thick steel plate 12 x 12 inches that will allow the magnet mount Wilson 1000 to be attached to. The 3/16" x 12" x 12" steel plate is available from most any metal supply places, and more than likely all ready pre-made ready to go. The Wilson 1000 has a very flexible whip antenna, that will not get damaged when going underneath Gas Stations or low lying stuff. And shouldn't take out Fluorescent Lights. Mine didn't, but has a few memorable slight dings when something was hit hard, will not effect the antennas performance..

They RTV'ed the plate to the motor home roof, this allows the magnet mount antenna something to stick to and the aluminum sheet metal on the top of the motor home to be the proper ground plane as needed. And with Fiberglass Motor Homes, connecting 3 each, 102 inch long wires to the metal plate will work for the ground plane. The wires can be routed in any direction, and held down with the same Rubber Silicon RTV.

One other thing that is a must! You will need a radio that has a "Noise Limiter" switch on the front. This will significantly reduce any electrical noises coming from the motor home. Believe me they didn't make the Motor Home free of electrical noises.

Some guys have a CB Shop install the radio, tell em you don't want any engine, alternator, engine computer noises, or other electrical noises in the radio, when the engine is running. Got to have the engine running.

Motor Homes are famous for NOT having a 6 or 4 gauge wire connected to the Engine Block or Alternator or Starter going to the batteries negative Terminal. This is done to save a few dollars for the Motor Home Manufacture. But this will force the Engine Starter and Alternator currents to go thru the vehicles drive train and frame causing electrical noises.

Its also a good call to install grounding wires from the fender to firewall to the hood, this fixed a Lions Majority of noises in the Ford F250 4X4 Truck, with the worlds loudest PA System. Its a blast at Old Car and Oldie but Goodie night at the drivein! Also for slow pokes in traffic!

Any way good luck.

Oh my, I have some things to do to make to 4500, isn't it?!

So... 100 new pics are not enough, let me see how many I
can post tomorrow..... will I really carried away with the beauty
the nekked male? Just wait and find out.

Oh my, I have some things to do to make to 4500, isn't it?!

So... 100 new pics are not enough, let me see how many I
can post tomorrow..... will I really carried away with the beauty
the nekked male? Just wait and find out.

Guy goes to the doctor. He says, "Doc, my problem is that I like to
have sexual intercourse a lot. A whole lot . In fact, I have it so
often it makes blisters and scabs on my wang. I compulsively pick at
them, and they bleed. What am I to do?????"

The doctor said, "Don't fuck with it. That'll be 90 bucks for the
office visit. Thank you."

Do I look inflamed to you?

The odor of kerosene repels snakes
and for good reason.
Kerosene is a natural degreaser.
Snakes are covered with a fine coating of oil.
Kerosene would suck dry the snake's body oil,
which probably feels the same as if someone poured
hydrochloric acid on your hand. Not very pleasant.
So when a snake smells kerosene,

or more accurately tastes-
-a snake breaths with its tongue-
-they slither in the other direction.
No word on kerosene's ability to tame a wild mullet.

"The Unofficial MacGyver How-To Handbook"

A wise man's question contains half the answer.

Just use a cell phone to get road reports. You can't use CB anymore
because of all the retards farting, belching and playing music.

That is true.

The cause for revoking his license is that he has a problem with following the FCC's rules. The rules are there for the benefit all of us. If he doesn't like the rules he should turn in his license in protest not spread hate. What ever happened to the true sprit of ham radio where those with higher knowledge would help left up those with less instead of pushing them down.

SC and Steve are almost the only people who post about policy.

You know marqueer, if you looked to k4yz as a role model that would be
your first step in getting the help you need.

Notice that Robesin has no problem with this kind of "ham bashing," but
if you even hint that people use cell phones or that there might not be
enough volunteers...

I have I have not fully wraped my brain around the extent of his
madness and this started because I dared disagree with on code testing
I wish I get a professional with thepower to confine a dangerous
person to mental hospital to read all of Robesons posting here he
would the help he needs and we would get a break (or the pro would
lose it and go postal)

Hello All:

Ok here is a little more on the Motor Home Install.

Usually supplied is 18 feet of RG-58C Coax with many antennas isn't long enough for most Motor Home installs.

By replacing the cheap-O RG-58C Coax with RG142 or RG142B or RG-400 Teflon Coax, with the length that is needed will be a big improvement over the cheaper RG-58C coax supplied with the antenna, in this is case a Wilson 1000 or 5000 Mobile Antenna. Its not a easy thing to do changing the coax but not impossible. And its costs more money.

This allows you the longer length you need for the Motor Home Install, and the Teflon Coax will last forever. And take several hundred watts to a grand without any problems.

Cable Experts or most all coax dealers carry the good Teflon Coax.

It is interesting to see this subject broached. I have been wondering if it's possible to install a long wire antenna on my 31 foot MH, tuned to the cb frequencies.

Does hearing skip give you hard-on? Ever give your CB a facial when the band

Hello Nate:

Sure anything can be done.

There use to be luggage rack type antennas sold for vans and Trucks. These antennas where horizontal of course, and because of there close spacing to the top of the metal vehicle the pattern would have shoot most of the energy up in the air warming the clouds. Some guys swore by them, but I never saw one work.

A long wire could be used, I would start off with a 1/4 wavelength 102 inches long and see what happens. You might need a tuner or some matching transformer. The bad thing with a long wire I would think would be the pattern energy going mostly up by there should still be some for local short range contacts.

How where you going to install it?

The reason I suggested the Wilson 1000 or 5000 is that they are proven performers for the last several years. And they have a whip antenna that can be used and survive the low lying things out there. And work really well.

I have seen especially here in the southern california desert, many motor homes towing a dirt bike trailer that has a 102 inch whip antenna on it, and the coax going from the motor home to from the trailer.

Many use a Trucker type antenna (3 to 5 feet long fiberglass antenna) mounted on the drivers mirror mount arms. This works good but ya might have to verify the ground is connected to all the vehicles aluminum body.

Lots of guys are in a large group of motor homes, one guys sneaks out early and sets up camp, putting up base station antenna to radio all the others into the camp. The radio contacts between the base camp station and mobiles get very entertaining especially after several drinks.

Wouldn't a long wire act like an end-fed zepp? Where do the lines
of force have to go to find ground?

With 30 feet of space, a half wave dipole could be installed and
would work better then a single end-fed long wire.

All that's needed is a balun to prevent currents on the outside
shield of the coax. And not a coax balun, a real torroid type one.

no lie told by me

you hate to opposed and are just a bully hiding behind his keyboard
...

Bully? Moi? Not so. If you oppose me, that is just fine, right? It is your
self-appointed moral duty, right? BUT, if I oppose you I am being a bully?
Get your disjointed thoughts together, Mark. You are contradicting yourself
in essence.

"yes I am I have the cowardage of my convictions"

I like that..."cowardage"...neat word and one worth remembering.

Now, isn't it time to put your three-legged horse in the stall? You've gone
above and beyond most folks' moral convictions by defending a purveyor of
kiddie porn. You are a Hero, Mark. Roger could only hope to live up to your
moral standards, such as they are.

Hi Yo Silver! Awayyyyyyyy!!

you claim (or was that deloeron who may still be you) claim I am going to be busted off hughes net been pormising that for roughly a year now it doesn't happen

do you do the same thing and stop and rethink your actions? no you go right being a bully You attack Tood becuase sometimes you can provake into a reation you like to make fun of,,, that is the sole reason you attack you prod Roger because his response amusses you and you find watching him foama t the mouth amusing

no it is you that lack a coherant thought

you attack someone for defending himself from anothers attack the
first attack was unun warrented as was yours I defend him from attack
that is what a moral person does when he come to a mugging
...

You are blathering again, Mark. Your "justification" for taking me and
others to task is circuitous at best, confusing at worst.
Your line of thought is again wandering in circles Mark, and you are
tripping over your mental shoelaces in the process.
You have no right to define that what is moral or not moral. Save that for
alt.morons or the bisexual groups. Who are YOU to preach of morals?
Mugging? Who mentioned a "mugging"? That is your descriptor, Mark. I merely
commented about Todd's addiction to cartoon kiddie porn. While YOU may think
that what Todd does is fine, his addiction to same is viewed by 99% of us as
being abhorrent and perverted. Like you, I have the "moral duty" to call it
as I see it and I don't have Abraham or Isaac behind me.

I've not attacked others. I've made statements of fact. I've made NO

"defending" Roger...see where that gets you. Or maybe you could simply post
two hundred more posts of "id tehft is a crime".

You are incorrect. More Mark Morgan Poppycock from your end. Of course I expect nothing less from you.
.
nothing unclear about the the notion that defense is always a good thing , it gets a bit murky at time when it become clear the only defense is a good offense
...
Unfortunately, you have no defense other than to post hundreds of times over that which does not concern you. You antagonize Wiseman far more than he does you. Wiseman posts ten times, you post ten times that. Steve posts three or four comments and you bounce off your Michigan Basement walls and rebut with another seventy or eighty posts.
In short? You have easily earned the reputation of being a Newsgroup idiot, Mark.
What you think to be a "good offense" is not. It is merely offensive.
And now to wait to see how you justify defending a kiddie porn addict...

Hello Scott:

Hope all is well in Baltimore.

Yeah ok good call. A dipole I think would work, how do you think it should be mounted. The big issue here is the mounting of the dipole. Some Motor Homes are aluminum and some are now figerglass, or even Carbon Composites.

The Coiled up Coax Balun doesn't work at higher HF Frequencies, that I have measured. And I tried quit a few. The Toroid Balun has so much more choking impedance thats not even funny. After trying a few coiled coax baluns, then installing a Toroid Balun Kit from Amidon, the difference was night and day.

I got off easy. When they stole my Id, it went apeship and pounded
their fucking asses into mulch. The rest went buggo on its own.

Sorry, I don't fuck retards or guys or retarded guys. *I* have
STANDARDS. Of course, that may not be saying much, since I once
stump-fucked a calf on a dare after twice the legal limit of tequila.
These days, I am more restrained and just stick to Nyquil and pills.

Attenuation wise RG141/142 has not that significantly less attenuation
loss than that of RG-58C. You are correct in that RG-141/142 will
provide better life than that of the RG-58C. RG-141/142 does provide a
more constant loss over its lifespan than that of RG-58C. This is due
in part that there is far less chloride contamination of the
dielectric. Thus less chances of increase losses over time. Also for
power handling capabilities, RG-141/142 has no more than that of
RG-58C.

Definitely an increase in cost. The double shielded silver plating of
RG-142B will set you back a few dollars more than that of RG-58C.

the radio I'm looking at uses 8 amps on am and 15 amps on ssb, on transmit.
I will wire the thing into the circuit when I get it to the motor home
but I would like to use it with a cigarette lighter plug, in the auto en
route.
Secondly what would be considered minimal antenna for 30 watts am and
100 watts ssb. I don't really expect to have much use for ssb of course.
I have K40 magnetic mount from some time back.

15 amps is likely beyond the ability of any cigerate socket to take 8
amps is pushing it a bit

Not continuously. The wire is only big enough to deliver 6-10 amps or
so for about half a minute. Draw that much current for longer than a
few minutes and the insulation will melt, the wire will short and you
will blow the fuse. Take your power directly from an unused accessory
slot on the fuse block.

You might want to go directly to the battery. As far as the K40. It's excellent, so long as you don't run power. I cooked mine. If you want to run power, get the Wilson 1000. If you get 100W SSB, I would get the Wilson 1000. You are close to max with the K40. I owned both, and thought they were equally effective, except for the power handling.

Feeling neglected again Mark? Is that the reason you changed your
nic twice this week? Please make sure you change it at least 3 or 4 more
times this week, it will make it easier for Jim, Steveo, myself and I'm sure
a half a dozen more people to prove your are deliberately trying to by-pass
news filters.

I have now kill filed this one, so unless you want to prove me wrong, you
will need to change another screen nic so I have to see your illiterate response.

I went some years back, about 3 weeks after a hurricane. The place was
still a wreck, but fishing was pretty darn good.

Yup, had him figured for a while. Contrary to Geo, Mark cries "poor
me" all the time. Strictly for the attention, I've given him way more than
he
deserves, so back to watching football and drinking a Newcastle.

So that little capacitor in the base of the coil can handle the full 500
watts?

Not unless they redesigned it. The cap would normally be good to about
150watts if you didn't push it.

Is that supposed to be hack? I didn't hack anything Mark, the above text is
a direct quote from your post. I did trim the post down to the part I'm
responding too though, that's proper netiquette, right?

Btw, have you tried a spell check? I'm no good at spelling either so
they're a must have for message boards, imo.

Likel? You mean likely, my spell check would of caught that one.

What goal am I reaching for, Mark? Everything is not a conspiracy in this

Hello All:

Yeah really! My neighbor set his K40 on fire with about 250 watts, and wanted another new one as they had a guarantee on them to be replaced. I went with him to the CB shop down town. The lady threw the K40 antenna into a large box with even more K40's in it! TILT! And said it will be a while before I get more in!

I said give the K40 back and we will fix it. The 130 pF capacitor had fried inside the base of the antenna. It was a common mass produced cheapie capacitor. I replaced the burnt one with 2 each 260 pF caps wired in parallel to make the 130 pF value. These where Mica 500 VDC Capacitors. It was a real Bear it get all put back together. We also replaced the RG-58C CB cheapie coax with RG142 Teflon coax as this will handle more power safely than the unknown mass produced cheapie coax.

Besides who wants to pay 25 dollars a pop for a transistor for unknown coax catching on fire?? I sure don't especially with a 8 pill amp!

The K40 worked great after the mod. A few turns of black tape around the burnt plastic base assebly and some High Gloss Black Paint make it look real spif a row, Ten-4! We painted on it K40-1 Can do easy G.I.

Oh well, I tried to have an honest conversation with you in here, my bad I guess. I'll not make that mistake again. I should have known better in the first place.

You give ham radio operators a bad way to go, Mark. It's a really good thing that they're not all as stupid as you.

Please snip rrcb from your cross-posted drivel in the future.

Thank You.

I thought caps in parallel acted like resisitor in series? That would make it
520 instead of 130. But dman, now you got me thinking. I am going to have to go
look it up. I don't recall for sure.

Man you got that right. Normally we rent a 47' Hetaeras (Spelling). cost $490.00 a day, right after the cane $275.00. Same for the rooms. $275.00 a night, $200.00 after the cane. Deal to be had if you work your cards right

Two caps in parallel are additive.

I may be wrong but I believe the cap value in a K-40 is 55 pf

Hatteras builds really NICE boats, very sea-worthy and very expensive to
buy. Just curious, was there a minimum on how many days you had to rent it?

Cool, I love the water too. That is a vacation of a lifetime for me but my
wife can't handle the sea-sickness, so we end up on a boat/ship that hardly
moves for a cruise vacation. Maybe someday I'll leave her home, she will be

glad to be rid of me for a week or so anyway. :)

Yeah send me some pics of that trip if you get the chance.

At any rate, it's no use. Can you imagine how fucked up he sounds with a mic in his sweaty hands?

He's a damn good argument for retaining the CW requirement for HF phone, eh?

Yeah I tried that first and it seems you're right, Pete. My Y-quad is wore out after many years of good service and I was wondering if the Maco comet would be much of an upgrade:

http://www.bellscb.com/products/antennas/Maco/maco_comet.htm

Or just buy another Y-quad.

http://www.bellscb.com/products/antennas/Maco/yquad.htm

I wish the PDL II was still being made.

You know I was watching the game. Detroit has the same problem the Yanks had in 1996. The Yanks had about 8 days off, and never got their bats timed. They still won, but were outhit easily in the series.

The other problem I had with the antenna, was the rigidity, as I mention. The whip is great on the highway, but go into a bank drive-thru or ot a tree lined street, and it sound like the roof was going to be torn off.

I drive around alot, and find myself looking at antenna often. I almost never see quads. I always see 3 element beams, and usualy with a combo of other ham antennas (2M and such).

Yes, check for a list from your news server.
Now and then the trolls from this group will make an attempt to infect
other groups, but they don't always get the attention they desire.

I would not take the power from the lighter plug.
I don't know how good they make the plugs in America, but I doubt that they are perfect connections.
Any poor connections where the contacts meet will give a resistance, which will drop voltage
and create heat. The voltage drop will vary with power output, so your supply to the radio could be bouncing up and down to your voice on SSB... which may cause warbling or other distortion.
Apart from any radio problems, you have to consider the heat being created in the socket and,
possibly, in the wires to that socket.

Peter.

If we were talkin' football then I'd agree. Speaking of which I believe
Steveo's Browns play the Jets this weekend.

I am going to have to bet him a 6 pack. But does he know our defense couldn't
stop a tumbleweed in the desert?

quite brutal i agree though their offense sux canal water. cant believe
we are 4-3 and an easy schedule the rest of the way except for a couple
3 toughies.

I'm the same way, always looking for antennas when I'm traveling about. I
like to use the flat side every now and then when the band opens up so I'm
going to put up another quad of some sort.

Yeah I was looking at the JO GUNN STAR and comparing it to the Maco Comet.
The comet is lighter and less expensive but I don't know about durability.
The 3 + 3 has a bit better rejection and gain numbers, if they're to be
believed.

I can't believe the Browns are giving 1.5 points. Our offense is totally
fubar and they just fired the OC. The D isn't as bad but pretty banged up.

I used an antenna like the Star back in the 70's called a Gizmotchy. I had a four element version. One thing that that beam had was a very deep null at about 120 degrees both sides from the front. Easily knock down a signal 6 or 7 S units no trouble. Had the top of the driven element at about 36 feet and it worked very well ground wave. I could talk with 5 watts easily here in Florida 100 miles just about every night.

The Star has a bit unbelievable rejection numbers. Still the design does not appear to be a bad one from what I can determine by looking at the pictures and limited description. From the boom length of the 4 element and three element designs it seems to be somewhat similar to what I had. My 4 element was on a 13 foot boom. It could have been on a slightly shorter boom.

Quads are very nice antennae. They are a bit more tidious to setup and
errect than single polarity yagis are. Being that the driven element
is a full wavelength the feed impednace is much different than that of
a yagi and a better broad band match can be implemented.

One disadvantage of quads is that they need to be physcally higher
than a horizontal yagi. Depending on how you mount the rotation of the
antenna, can even make the placement of the boom even higher. A major
advantage of a quad is that element for element, the quad will have
more gain than a yagi design.

One other thing is the fiberglass spreaders whould be protected from
UV light. Some form of coating to block UV light is a necessity. UV
light tends to break down the resin composition of the spreaders. In
years gone by bamboo spreaders were used with some degree of success.

One of these?

http://www.gizmotchy.com/

I've heard good things about those..I didn't find the price section so I'll
have to go back and do a little research later. I'd forgotten about them.

Have you looked at the maco comet quad? (I posted the url earlier) I'm
trying to decide which has the most bang for the bucks, along with the wind
load and durability considerations.

geeze mate. We really love our hobby up here. I get sore nipples just thinking about my radio gear. When we get skip to listen too, well that just sends me in to a orgy of spasms. Why do you think I have a towel over my radio. I bet you thought it was for keeping dust off. On the good days of skip I wash that towel quite often. aarrhh.. thats better. If you can not get turned on by your hobby, then I suggest you change to a hobby that does it for you.

Not if you set fire to one. It depends where it was in relation to the base
of the fire. It's been far enough away just to have heated up and melted.

anal sex is not illegal unless done non consentualy
//
Wrong, Mark.

A successful conviction for 28.355/750.158; Sodomy or "crime against nature" in Michigan requires penetration (People v. Carrier, 74 Mich App 161) though emission need not be proved. Punishment is a felony with a term in prison of not more than 15 years. If a person is labelled a "sexually delinquent person" then the state may punish that person by imprisonment in the state prison for an interminate term, the maximum of which shall be imprisonment for life.

Michigan

* Statute: 750.158, Crime Against Nature. Unconstitutional under
Lawrence v. Texas.

* Penalty: 15 years

* Classification: Felony

* Restrictions: None

Invalidated by local trial court, Michigan Org. for Hum. Rts. v. Kelley, No. 88-815820 CZ (Mich. Cir. Ct. Wayne Cnty. July 9, 1990), The State has not appealed. In late 1992, there was a decision of the Michigan Court of Appeals to uphold the statute, which has effect statewide effectively reversing MOHR v. Kelly. See People v. Brashier, 496 N. W.2d 385.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

The only question Rusty needs to answer is why he acts like such a bloated racist douchebag pizza boy homosexual pedarast.

Yep that looks like it. I wonder if they redesigned the boom to element clamps. That was the one weakness of the antenna. They used to be made of "pot" metal aluminum and would crack after time due to the wind. I had a freind tool some clamps for me from 6061-T6 aluminum and they worked superior. I also replaced the Polyethelene dialectric spacer in the gamma match with teflon.

Saw the pictures on the web page. One thing that would be better for very long beams, >5 or 6 elements, is to increase the boom diameter. This will prevent saging and not require the boom supports. This would be acceptable to boom lengths of about 25 feet or so.

Never looked at others. Don't really spend that much time on the air any more.

Hey buddy, the other Russell B. I've not even heard of except the
occasional mention of him on some of the groups I visit.
Not me, for certain.
I had no idea anyone else uses or used the "The One True Rusty"
moniker.
Oh well.
Hey, I would be remiss if I didn't take this opportunity to mention
that Alex "Dink" Cain is a midget and a homosexual, and also Meat Plow
is a drug-addled penniless loser who spawned retarded offspring.
Later!

Good to hear, and rather than all this argument and speculation I just used common sense and asked "Rusty Waters" himself.

And in fact has come out of the closet, announcing on Usenet: "I will personally come to Shadowville and suck your dick, Will"... amazing, when Dink came out, he came out big time!

He can't seem to manage to write his first song, either, after bragging for weeks about his "superior musical abilities".

Don't be so scarce, pal!

Speaking for myself, I usually get a couple three guys within 60 miles or
less from me on SSB. 27.385 lsb mostly. I'm strictly a side-bander unless
I'm on the highway. There's no shortage of people to talk to either.

A good antenna is needed, and a ratchet-jaw doesn't hurt either. Sometimes
the band opens up and you can talk to Australia. Rock on.

Thanks James, that antenna is sorta tempting and looks fairly stout
especially if I could say I'm ruining a 'gizmotchy'. I like the sound of
that!

I'm leaning toward the 3 element jo gunn tho. Reckon that's OK?

I do it my way, Mark. Get over it.

Now, Mark...what is "homobrew"? It is, after all, YOUR word, so what is it?

Is there some reason anyone should care, pseudo-Mark? Blatant homophobia
isn't as cool outside KKK circles as you seem to think. If you don't
like sexuality shoved in your face, refrain from public displays of
affection first. Of course, you probably don't have a choice, meaning
you're motivated by jealousy, but I'm giving you a tiny benefit of the
doubt.

since Lenny Bruce died, Hoffman said, "Really? He was my god." The
combination of satirical irreverence and sense of justice that Bruce and
Hoffman shared was the real spirit behind the Yippies--a term I coined to
describe a phenomenon that already existed: an organic coalition of stoned
hippies and political activists who engaged in such actions as throwing
money on the floor of the New York Stock Exchange, then explaining to
reporters the meaning of that symbolism. Folksinger Phil Ochs summed it
up: "A demonstration should turn you on, not turn you off." So when
journalists link the Yippies with misleading bedfellows, at best it's
careless shorthand; at worst it's deliberate demonization. Osama bin Laden

This professionally improved Realistic HTX-100 Amateur Radio
Transceiver is a close cousin to the Uniden HR-2510 and HR-2600 amateur

radios. Frequency range has been extended to cover 26.000 Mhz through
30.000 Mhz. The CW function eliminated in order to add Lower Sideband
capability to the existing Upper Sideband function. Microphone gain
slightly opened and output power increased to +/- 35 watts. Fun radio
to listen to international DX pirate stations near 27.555 USB and the
old standbys on CB channels 36 to 40 (27.365 to 27.405). This radio is

in beautiful condition and includes original microphone, power cord and

a copy of the owner's manual. $125 shipped in the USA. Will ship
worldwide with buyer paying shipping costs. PayPal only.

"Consider that language a moment. 'Purposefully and materially supported hostilities against the United States' is in the eye of the beholder, and this administration has proven itself to be astonishingly impatient with criticism of any kind. The broad powers given to Bush by this legislation allow him to capture, indefinitely detain, and refuse a hearing to any American citizen who speaks out against Iraq or any other part of the so-called 'War on Terror.'

"If you write a letter to the editor attacking Bush, you could be deemed as purposefully and materially supporting hostilities against the United States. If you organize or join a public demonstration against Iraq, or against the administration, the same designation could befall you. One dark-comedy aspect of the legislation is that senators or House members who publicly disagree with Bush, criticize him, or organize investigations into his dealings could be placed under the same designation. In effect, Congress just gave Bush the power to lock them up." -- William Rivers Pitt

"It has become clear in recent months that a critical mass of the American people have seen through the lies of the Bush administration; with the president's polls at an historic low, growing resistance to the war Iraq, and the Democrats likely to take back the Congress in mid-term elections, the Bush administration is on the ropes. And so it is particularly worrying that President Bush has seen fit, at this juncture to, in effect, declare himself dictator." -- Frank Morales

Mark has decided to be the new de-facto group moderator. He thinks that he deserves this position due to the sheer volume of his posts alone. According to Mark we are all guilty of identity theft, others of us are guilty of yet to be named "crimes" and those of us who disagree with him are "liers".

Mark will now accuse me of being Steve, or Dave, or Roger, or whoever is his accusee du jour, and you may rest assured he will post in bulk.

Go for it, Mark! Speak, Boy, speak!

You already did. And I do not "need to pove" anything to the likes of YOU,
Mark. You are, for the most part, an inconsequential flea, one that I toy
with at will.
Tell you what, Mark. When you learn to use a spell check program I'll use my
real name. Better yet. When you learn 5wpm and upgrade, I'll meet you on 17M
some afternoon and you can then learn my name AND callsign.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

"When I told Abbie Hoffman that he was the first one who made me laugh
since Lenny Bruce died, Hoffman said, "Really? He was my god." The
combination of satirical irreverence and sense of justice that Bruce and
Hoffman shared was the real spirit behind the Yippies--a term I coined to
describe a phenomenon that already existed: an organic coalition of stoned
hippies and political activists who engaged in such actions as throwing

money on the floor of the New York Stock Exchange, then explaining to
reporters the meaning of that symbolism. Folksinger Phil Ochs summed it

up: "A demonstration should turn you on, not turn you off." So when
journalists link the Yippies with misleading bedfellows, at best it's
careless shorthand; at worst it's deliberate demonization. Osama bin Laden

to levitate it." -- Paul Krassner, http://tinyurl.com/ehu3v

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

Oh, come on. Admit that you're obsessed with Mark and want him to suck
you
off, Wabbit. I think, in fact, all the repressed gays of rec.radio.*
should accept themselves as gay.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

Oh, come on. Admit that you're obsessed with Mark and want him to suck
you
off, Wabbit. I think, in fact, all the repressed gays of rec.radio.*
should accept themselves as gay.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

This one should provide enough fodder for Mark to post no less than 200
comments this Sunday, none of which will make a lick of sense. Of course,
making sense has never been one of Mark's strong points and he needs a
minimum of "goading" to go on and on and on and on and....well, no more need
be said. You can rest assured that a plethora of misspelled one-liners is
sure to follow.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

Oh, come on. Admit that you're obsessed with Mark and want him to suck
you
off, Wabbit. I think, in fact, all the repressed gays of rec.radio.*
should accept themselves as gay.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

Oh, come on. Admit that you're obsessed with Mark and want him to suck
you
off, Wabbit. I think, in fact, all the repressed gays of rec.radio.*
should accept themselves as gay.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

Oh, come on. Admit that you're obsessed with Mark and want him to suck
you
off, Wabbit. I think, in fact, all the repressed gays of rec.radio.*
should accept themselves as gay.

hey marqueer
why don't you listen to sc & chris and clean up your act?
also, try to rid yourself of the urge to have a penis in your mouth.

I was having REAL FUN with the CLOWNtesters this weekend all
on HF. Set the rig's tx output to about 10 watts and loaded up
into the 75m carolina windom with DX callsigns and the occasional
rare ITU section. Give em a call and these DX CLOWNTESTERS
would fall all over each other thinkin they just worked a needed
section an they now will be pinchin a loaf waiting for a card to
arrive in the mail to hang on their wall and impress their fatassed ham
club blokes! Baaaaaaaaaaaaaaaa hahahahahahhahaha!!! what a bunch of fools.

Hello Bob:

Yeah that is what I was hearing yesterday also. A hole, lot of Co and NM!

Today was out working on a Moonraker 4 element beam, while listening to
38 LSB, wow I heard Brazil, Hawaii, Co, NM, ID, Or, Wa, and other
stations all over. Kind of wild to hear so many different locations
within a few hours.

Am trying to "not" go to E-Bay.....

FS

1 - Courier CB set. I don't have it right in front of me for the "model" number, but it is an "all" chrome cabinet, black face radio with 40 channels. It is capable of doing DC - which it worked on when last tested - and it also will do AC, which I've not checked - yet. It is "mobile" size. Case in decent shape. A 9 or more out of 10.

1 - Radio Shack CB set with the "telephone" type handset/mic. It is in my shop too, so no model number to give at this second. It also worked when last tested. Case is in like a 9 or better out of 10

1 - Receiver pre-amp - relay controlled? System made by Antenna Specialists. Quite honestly, I'm not sure "what" it is or exactly how it works. Never seen anything like it before. Don't have time to test it, but it was said to work ok when I acquired it - and was "led" to believe it is a pre-amp. "Part" of it is in a brown (Alliance Rotor color) box and an extra part is similar to an Encapsulated circuit. There are cables and connectors to connect the two together.

Pics are available for these or other items. I've got tons of stuff, parts, etc. Need to clear out the shop. I also handle some "new" CB/2-way/ham related items.

Accepting "reasonable" offers on the above items. If you're in need of something, ask - I may have it.
I'll take the top offer of those received, if more than one offer received - per item - of those listed within.

Items are sold AS IS, non returnable. Not responsible for any "mods" made by the buyer which may affect performance. Shipping is extra. Payment via Pay Pal or Postal MO to get fastest service. Items will ship within 48 hours or the next "business day" falling in the 48 hour window - once payment is received.
I use Postal OR UPS service.

"When I told Abbie Hoffman that he was the first one who made me laugh since Lenny Bruce died, Hoffman said, "Really? He was my god." The combination of satirical irreverence and sense of justice that Bruce and Hoffman shared was the real spirit behind the Yippies--a term I coined to describe a phenomenon that already existed: an organic coalition of stoned hippies and political activists who engaged in such actions as throwing money on the floor of the New York Stock Exchange, then explaining to reporters the meaning of that symbolism. Folksinger Phil Ochs summed it up: "A demonstration should turn you on, not turn you off." So when journalists link the Yippies with misleading bedfellows, at best it's careless shorthand; at worst it's deliberate demonization. Osama bin Laden wanted an aircraft to crash into the Pentagon. Abbie Hoffman merely wanted to levitate it." -- Paul Krassner, http://tinyurl.com/ehu3v

Ah, Meat, you seem to be having a memory loss problem.

You know good and well that I drink like a fish (in fact I stayed
roaring drunk most of the weekend in honor of Dylan Thomas) and most
mornings I enjoy black coffee spiked with George Dickel... you seem to
have a problem with that, but not me, pal.

No problem. I just picked up some Johnson Viking equipment that appears
to be boat anchors. One is a matcher and the other is some sort of
amateur xceiver I've never seen before. fooker is 40 pounds plus. Also
got a Swan SW-240 amateur rig which, when I googled it, was deemed to be
a good rig. I'll have to post a pic to see if anyone knows what the JV
rig is. I've got no need for any of it.

I prefer chrome plated brass for marine and salt environment over
stainless steel. With enough exposure and time, SS will rust. Brass
never rusts.

you are not the person you are claiming I because I can watch her
working here in the room with me

we know you desperately want the AUK to spend more time and energy on
RRAP mostly because you can't carry on an efective flaming of anything

but truely wabbit you are in sane to be carring on your jihad agonst
someone you don't know and has never harmed you in the slightest

I have to assume ghetto mikey starts out by lighting up
his crack pipe. Or did he go to meth?

I just got a script for Vicodin, which is kicking in now...

Did you know that Coffee is the biggest (legal) cash crop (after Oil)
on the planet.

You can see it in American exploitation...

The Oil producers we fuck with using computer driven
missles... The lessor $$$ we just jerk around.

Cheers James, but where am I missing something when you say stainless
steel rusts? Wouldn't brass oxidize in a salt environment? Besides what
I am reffering to is the nuts/bolts holding the kit together. An
observant operator will inspect his kit yearly and make adjustments
accordingly.

nope the current rumor about him going around amoug Hams ios that he
got out of the slam a couple month on DUI beef and lost his Ham
license and so is REALY majorly BITTER about ti

not sure how much of that I beleive myself I think he may be K4yz
hiding out

but he posts nothing positive anywhere that I have seen

Stainless is usually adequate for one antenna lifetime here in Ohio. Dunno
much about antenna hardware life down by the sharks and such.

Well, we knew it was up for grabs, so why not? He seems to have the
spare time, and he knows what its like to go wanting for an apology.
So he can be empathetic with many of the contributors to RRAP.

I was doing some browsing on the subject of CB, and came across this article. It is overly obvious, that this person hasn't the slightest clue about CB radio, yet spews forth his "knowledge" as if it were all fact...

A few favorite quotes:

"...according to Mark Pili, owner of Karl's C-B Shop in Las Vegas, Nevada,... The actual potential output from a 100% legal, stock, out-of-the-box CB radio at full modulation is much closer to 7 watts. By adjusting the potentiometer 'pot' setting inside a CB radio, a technician can adjust this potential output upward to nearly 11 watts, and the "4-watt" radio will still be legal."

"...any 10-meter amateur radio can be easily modified to work on the CB channels...Initially these radios were used to just reach the 40 channels below and the 40 channels above the common 40 CB channels. This is what is referred to Single Side Band (SSB). These radios have switches for Lower Side Band (LSB) and Upper Side Band (USB)."

Howdy Jim,

Yes SS does rust, but at a far lower rate than regular steel. Brass might
oxidize a little, but will never corrode under salt air environments.

I heard from a friend of a friend over on The Hill that this is THE place to hang out for a chance at getting my hands on some homobrew.
To begin with, I'd like to know what homobrew is. It sounds yummy! I am supposed to ask for somebody named Mark something or other. I was told that Mark is a former Top Secret rated Army Colonel and is now a Geophysicist somewhere in Michigan and is a partially disabled consultant. Oh, and I was informed that he has a pet chimpanzee as well.
I do so hope I've narrowed the descriptors down enough so that one of you can be of ASSistance to me. You will be forever in my debt and my back door will always be open to you should you wish to come visit.
Yours truly:

Hey Shark, my point was that stainless when used and inspected accordingly would perform just as well as brass at a lower cost. Should have said that originally. Its actually a silly point as we are talking nickels and dimes.

Having been here from the beginning I have seen the highs and lows but this is the worst it has ever been. Even in the past years when the professor argued with everyone and wanted to sell maybe 1% as much as a davemade product there was still some sanity here. When he argued with painkiller it was still funny. When they argued about who made teh best amplifier it was amusing. When we discussed SWR and coax length it was informative. When we discussed mobile beam antennas, that was interesting... Shit even when those 2 guys started that anti keydowner club that was so amusing... But for the last 2 years I think the only thing happening here is GAY SEX talk and what really is so fuckin strange is that for one, who the fuck cares that you are a cocksucker and why would anyone on a CB group want to know. Mostly if that is your preference... shit there are so many groups that would love to have you discussing balls and cock stuff. Why here???
How we wish for the days of professor having meaningful arguments and not just spamming the group. How we wish for the old timers TOLLFREE, ICECOLDNYC, SEAN, BILL and so many more... This place has gone to hell in a handbasket.....

****

Nuts and bolts are exactly what I am talking about. Brass, like SS,
have many different alloys in which some are better than others. I
should also mention that not all brass is usable for screws and nuts.
With brass too much zync and/or too little zync make most brass not
usable for screws. Too m uch zy nc and brass becomes brittle. Too
little zync and it becomes to soft. Aluminum can be added in small

amounts to make brass more resistant to oxidation. Also brass is heavier than SS.

SS is not totally resistant to rust. There are several alloys of SS that are less reactive with salt air environment. Yet eventually they to will start to rust. Brass will oxidize with the salt air environment. The oxide from brass is far easier to clean and less evasive than that of oxidation from ferrous material. Ferrous oxide, rust, will consume the entire ferrous metal. With brass, oxidation retards as the surface area is coated. With brass the oxidation acts like a protective coating and when there is no more exposed brass, oxidation slows dramatically. Iron based metals do not exhibit this quality.

Next to the coast here in Florida, I have seen SS start rusting in
less than a year. Also, I used to own a boat and after a year or two,
every piece of SS on the boat was replaced with chrome plated brass.

Dang, that seems fairly quick but I don't doubt it. Thankfully we only get big snow here, no salt waters except what sprays up from the salted parking lots and roads in the winter travels on your vehicle.

Isn't copper as soft as your dick after you're done fucking tho? I can't imagine it as a mounting hardware.

Having to learn something for a ham license scares them too. Now if they
want to learn CW up to 15 wpm I'd have a QSO with them, but I ain't got
time to listen to the 5 wpm CW from a nickle Extra.

Why do No-coders always break down in the middle of an argument and start

And it's all some alpha-hotel hams!

I find that people who will sit behind a microphone and talk to strangers to be the same type of people no matter if they're hams or CB'ers.

I find myself turning my CB on just to hear people that don't run their mouth from the same script every time they key their mike and to talk to people without that "holier then thou" attitude.

Now put that in your pipe and smoke it!

Yup! The stupidest thing I hear. It's a CW abbreviation for laughing!
Just f'ing laugh if you say something funny. The guy that always says
that doesn't even know code and he always uses the same script.

2 meter simplex can sound a lot like CB. Repeaters are way too stuffy.
Now 440 only repeaters are a different story. Whole 'nother crowd.
I guess 6 meters will have a different crowd. That's the only neat
thing ham radio has going for it, if you don't like one band, just
go to another. CB is just another band of frequencies and a group
of folks that use it. Each band is unique.

I've never said one has to abandon CB for HAM or vise-versa.

No one group has the market cornered on stupidity! :)

Good point. N8WWM has almost cornered stupidity, in my brief time here.

Living in welfare sub'd apartments prolly crimps a guys antenna footprint

Hello Bill Gates:

There is truth in what you say here. But let me add a few things that would help things out here.

First off, we all need to ignore and NOT reply to the trolls and goof balls, PERIOD! By replying we just keep the pot being stirred, we allow it to continue.

Life is like a big super market, you can get all the wrong things, but mostly you just keep on trucking past the crap. Same here.

I enjoyed many of the conversations here we all had and learned many things. I really looked forward to seeing everyone's reply. It kept my nose in the books, having to look stuff up. It was conversation that kept us on our toes and was a lot of fun!

I remember Dennis #12, TNOM, Seen, and few others having a great discussion on the difference of PEP and RMS power values. There isn't any and this raised the roof. It was great. We found out that most of us didn't know the difference and had to go look all this up. I'll bet there was hundreds of postings and several threads. And the Trolls where totally ignored. The Trolls even tried to participate but just ignored. But then they tried to act civil, and join in the conversation.

Just like on the radio, CB or Ham, if they can't Jam ya, then after a while they give up and will try to enter into the conversation. Thank goodness for Cell Phones, hehehehehhe!

One of the local politicians was being interviewed by the local liberal goof ball news ladies. Every negative thing she said, he turned around and made a positive response to it. But ignored the really negative ones, I think he asked her if the news group she was working for had such poor ratings, was triggering the poorly thought out questions, it was great!

Some guys try to push the Ham Radio on us, and give the impression us as CB'ers are dirt under there finger nails. This is just human, again not worthy of replying. Most Ham Radio guys are a great bunch with just a few goof balls thrown in there, as is with any group.

We can have our news group back. Its just a matter of ignoring the trolls, and getting a few more involved. And again not allowing the trolls to be acknowledged.

I still make good contacts with friends and such here at times. And I still get a few e-mails over the posts I make.

Jay in the Great Mojave Desert, at least thats what the restate guy told
me. But then he left 2.

It cramps HAMS too! That can be a good thing. :)

The Gov in this state has realized the usefulness of HAM radio in emergencies, and is working on a bill to allow hams to erect resonable antennas to help out.

I could put up an 11 meter antenna and say it's for 10.

Also, now the Red Cross wants background checks from mybackgroundcheck.com and that is causing one big stink!

What do you have against Foley?
After all, he's a good little repub fundie, just like herr
shrubbie, Pat Robertson, Tom DeLay, Jerry Falwell, Jack Abramoff,
Ted Haggard, Cheney, ...

Famous Republican saying: "Everything is fine in politics as long as you
don't get caught in bed with a live man, or a dead woman.ï¿½

Did you hear the one about destroying Afghanistan to
arrest bin Laden (and resume normal Heroin $$ production)?

How about the one about Pakistan telling US forces to keep
out & to leave bin Laden alone?

How about the one about destroying Iraq & murdering 655,000 ++
to get more "WMDs" (and higher $$ oil prices)?

[
Quotes: Family Guy: Peter
[Riding a circus elephant]
Peter: Look Lois, the two symbols of the Republican Party: an elephant, and a
fat white guy who is threatened by change.
]

"It does not require a majority to prevail, but rather an irate, tireless
minority keen to set brush fires in people's minds." - Samuel Adams

As far as I'm concerned... saturation has nothing to do with the class the amplifier is running. I can saturate an amplifier in any class. Saturation is most ofen an undesireable effect... that causes distortion in amplifiers.

------------ REPLY FOLLOWS ------------

Saturation is only undesirable in LINEAR amplifiers. In non-linear
amps which are often used for CW, RTTY or FM, saturation is good
because it improves efficiency. Distortion in those applications is
unimportant.

Don't worry about saturation. CB'ers think over saturation produces
a better sounding signal. Of course, on ham radio we would call
them Lids.

Hello Scott

You've haven't had fun 'till you've used a bunch of linked repeaters on
different bands. Our megaplex repeater has a large number of ports that
cover 10 meters (FM of course), 6 meters, 2 meters, 220, 440, 900, and 1.2
GHz. Nothing like talking to an Aussie as if he were also on a handheld
next door. Talk about sweet audio ;) Oh yes, England too ...

You are also right .... no need to exclude either ham or cb (nor MURS
either, come to think of it LOL).

Um ... nor FRS for that matter, but the range is a bit limited LOL.

It can be messy. The class of amplifier is determined by the cut-off (or lack thereof). A class A amplifier neither hits saturation nor hits cut-off. Maximum theoretical efficiency (of a sinusodal waveform) of a class A amp is 50%, but 25% is typical. Very low distortion, of course.

Class B amplifiers are biased at cutoff and only conduct for 50% of the cycle. They shouldn't saturate, however. Efficiencies are around 60%.

Class C amps are typically biased well into cut-off and only conduct for perhaps 90 degrees (25%) of the cycle and can run 70% efficient.

However, there are class D and E amplifiers and they are switchmode amplifiers. They run on or off (cut off or in full saturation). They are normally used for CW or FM and there was a circuit (and components) available from a university to build a cw transmitter using switchmode. The thing ran about 93% efficient!

To add to the confusion, with solid state it *is* possible to use the darn things as a *linear* amplifier! Yep, commercial radio stations now use these things. The problem is that the control circuitry (which, I believe, controls the voltage fed to the final) is very complex and expensive and will be found neither in amateur nor cb equipment for a long time.

Hey Morkie...YOU are the one who said it's OK to make up any screen name you want and use it to any means you choose to do so.

So why are you now contradicting your own previous statements?

No, Morkie...No one else here has to do anything to try and "embarish" you...You do it all to yourself without any help from anyone here.

Claiming to be a field grade military officer when you're not is an embarrassment (and MAJOR insult). Then compounding THAT lie with one about having been an NCO when you never were makes it worse.

Claiming to be a 3-time college graduate when you can't spell correctly SHOULD be an embarrassment (not to mention a waste of money and a seat that someone who COULD have made use of the education with...)

Having been investigated in not one but TWO states for child molestation and elder abuse IS an embarrassment.

Getting repeatedly caught in one lie after another is an embarrassment.

In otherwords, NOTHING about YOUR alleged "sexuality" could be an embarrassment to YOU, Morkie...Quite the contrary...I bet there are good homosexuals, bisexuals and Pagans all over the world who wish you'd shut up and stop embarrassing THEM!

I know that as an Amateur Radio operator you embarrass me.

Let me get this right. Mark claims to have once been a Colonel. I've seen that. I missed the claim that he was a non-commissioned officer, such as an E-5 or above.
Mark is now 42 years old by his own admission. If one goes back twenty years to when he "may" have been in the military, that means that Mark had an astounding career. He rose from an NCO to a Field Grade Officer, a Colonel! That is an astounding record for anybody, much less a National Guardsman. To go from an NCO to Field Rank in a few short years is unheard of.

Hey, Mark. Were you a "light" Colonel or Full Bird? Did you get this alleged promotion before or after you got your degree in Geophysics?

What was your MOS? Enquiring minds want to know.

Oh yes...Morkie claimed to have an onset of honesty and "admitted"
that he was "only" an NCO in a "chemical corps" unit.

He tried to hammer me a couple months ago over a unit he was
allegedly in. Of course the unit has since been "disbanded", according
to Morkie, and he's not been able to present a single bit of evidence
to his honest participation in the Armed Forces.

He tried to make up a unit at Fort Sill that was a 'sound alike" to
a real unit.

The really amazing thing is that all "started" when he was
"drafted" at about 7 or 8 years old.

His initial "claim" was that he was a LtCol in the "U S Army
Chemical Corps". When I busted him on the fact that there was NO
officer by his name then it was "I don't serve under my real name...The
FBI and DoD said I could lie.".

Not too long after that he claimed that, well, he wasn't REALLY a
LtCol...but "just" a Lieutenant. (...not specifying 2nd or 1st...)

Then he started in on how he had "admitted" his sexual perversity
to his "CO", yet was not allowed to "resign" in as much as his MOS was
in such critical need.

All of this was concocted by Morkie in a VERY lame effort to
dislodge me from his other USENET misconduct under the woefully stupid
idea that as a retired Marine Corps Gunnery Sergeant I would relent in
the face of seeming to criticize an Officer.

Yeah. Right~!

In the Marines he would have been a "1369"....Unlucky #### Sucker".

When you place 100 or more posts a day, is that not a "crapathon"?
Sure it is.

You haven't the sense to see that Slow Code is returning your spams in kind
in an attempt to show you just how ridiculous you are.
You need professional help, Mork. Perhaps Woger will loan you his therapist.

Slow Code's hallucinating. Mark won the *Golden Killfile*, not the
Busted Urinal. No one in rec.radio.* has won the BU, at least not
lately.

You're right, I stand corrected.

Hey Markie, Sorry,
That was the first mistake I ever made on usenet.

You can keep trying for the busted urinal. Good luck.

I didn't bother checking Markie's marks in the world,
but from the crossposts I have seen in a.a.p.c/r.a.p,
I saw no reason to doubt Slow Code's comment.

Now, now slow idiot. Your delusions seek to gain the better of you,
hold out and fight back man, get yourself some decent backbone!

There is no danger of tossing morse onto the trash-pile and following
progress. Indeed, many works in art, literature, poems, novels, etc.
have documented and made lesson of how often times a man can be made a
fool and prisoner of his own fears. You are doing no less, but before
our eyes you demonstrate a real life example. Quite educating really.

No, we need not fear amateur radio becoming a chitty service, we only
need to fear chitty hams--such as the like of you...

"If you don't have pedicures AT LEAST every two weeks, don't talk to me.
If you don't floss every night and morning and brush at least twice a
day, don't talk to me. If you don't spend money on you hair and get
great cuts and color, don't talk to me. If you are heavy, don't talk to
me. If you don't shower every morning and take a nice bubble bath every
night, don't talk to me. If you don't have a loved one in your arms,
don't talk to me. If you don't keep an immaculate house, don't talk to
me. If you don't work, don't talk to me." -- Clearly, Martha Vandella
never wants to talk to me, which is for the best, really.

Mark's too boring a k00k for any other awards. Now, Slow Code, OTOH,
looks good for several, including BU, teh Bartlo, and possibly KotM.

I don't follow these things well, but the *Golden Killfile* may have
been the Bishop's first award.
I know that he /has/ it, tucked somewhere dark and moist...

There are different grades of Stainless Steel. Contrary to most
people's belief, not all SS has excellent corrosion resistance to salt
environments. Grade 304, w hich is very common and cheap, is not very
resistant to salt corrosion. Grade 316 is. It also is more costlier.
Chrome plated brass and non plated brass is cheaper than 316 SS in
most cases.

"If you don't have pedicures AT LEAST every two weeks, don't talk to me. If you don't floss every night and morning and brush at least twice a day, don't talk to me. If you don't spend money on you hair and get great cuts and color, don't talk to me. If you are heavy, don't talk to me. If you don't shower every morning and take a nice bubble bath every night, don't talk to me. If you don't have a loved one in your arms, don't talk to me. If you don't keep an immaculate house, don't talk to me. If you don't work, don't talk to me." -- Clearly, Martha Vandella never wants to talk to me, which is for the best, really.

There is nothing to fear John, unless you fear integrity and quality and
are against improving yourself. You don't have to do a single thing I
say, you can continue to be a scumbag if thats all you really want to be.

I'm only trying to keep the scumbags out of ham radio. It's people like
you that help there rest of us know what chitty looks and smells like. Tnx
for your support. Remember to flush the toilet when you're done crappin.
